

## Avoid the Thrill of the Chase

In the same way fad diets and exercise programs rise and fall in popularity, investment performance changes from year to year. The chart below illustrates the importance of diversification across asset classes.

### Historical performance

### THINK AHEAD. TAKE ACTION NOW.

**Stay diversified.** It's smart to invest in a mix of stocks, bonds, and cash. How much of each will depend largely on your age and risk tolerance.

This material was prepared for general distribution. It is being provided for informational purposes only and should not be viewed as an investment recommendation. If you need advice regarding your particular investment needs, contact your financial professional.

Indexes are unmanaged and do not take into account the fees and expenses associated with actively managed funds so performance may differ. It is not possible to invest directly in an index. There is no guarantee that any asset class will achieve a certain rate of return or outperform another asset class. Diversification does not assure a profit, cannot eliminate the risk of investment losses, and may not protect against losses in an overall declining market.
